Computer Engineering Technology,

Dean's List/ GPA: 3.97

Algonquin College Ottawa, ON Jan 2021- Dec 2023

EXPERIENCE

Technical Analyst – Application Modernization

Global Affairs Canada / January 2022 – April 2022

- Instrumental in the modernization and transition to the cloud for over 180 applications through tracking, analysis and the creation of a report to document issues
- Create, organize, implement, and edit supporting processes for varying departments
- Coordinate the process and use of governance documentation used departmentally
- Collaborate with colleges to facilitate change management processes such as replacement or retirement of applications
- Supported communication and strategy execution between teams in development and delivery of change and releases related to application modernization

Polysonographer

Queensway Carleton Hospital / April 2018 – February 2022

- Performed overnight sleep studies for the diagnosis and treatment of sleep disorders;
- Analyzed data for each patient and providing best recommendations to the doctor
- Troubleshoot all problems within a timely manner to ensure most accurate data collection during patients sleep schedule
- Reports completed using ALICE software each shift for all patients including the review and documentation of medical histories, physician comments/advisories and sleep study
